

ISLEM BARGAOUI

Tunis, Tunisia | +216 22 901 462 | islem.bargaoui.si@gmail.com | islem.vercel.app

*Versatile Full-Stack Developer with strong expertise in **web architecture**, **backend systems**, and **DevOps**. Experienced in building scalable, high-performance platforms using modern TypeScript and Java stacks, cloud infrastructure, and CI/CD pipelines. Passionate about clean architecture, system design, and long-term maintainability.*

SKILLS & TECHNOLOGIES

Languages: TypeScript, JavaScript, Java (11+), Python, Dart, C/C++
Frontend: React, Next.js, Angular, Tailwind CSS, IONIC
Backend: NestJS, Spring Boot, Node.js, REST APIs & WebSocket, Django
Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, Supabase, firebase, Neon DB
Cloud: AWS, Azure, DigitalOcean, Serverless, Virtualization
DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, Monitoring
Payments: Stripe, Webhooks, Secure Transactions
Architecture: System Design, Microservices, Monoliths, Scalability
Methodologies: SCRUM, Team Lead, Automation

LANGUAGES

Arabic: Native
English: Fluent
French: Beginner

EXPERIENCE

Freelance Full-Stack Developer

Nov. 2025 – Present

conductr.io

Remote

- Maintained and expanded the German clean energy platform **Conductr.io** using **WeWeb** and **Xano** no-code tools.
- Implemented a free staging environment on **Vercel**, enabling version-controlled testing and deployment with automated environment injection.
- Developed major features including invoicing system, request/offer lifecycle, collaborative project management, and advanced form handling via **Fillout**.
- Handled end-to-end development: new features, bug fixes, performance improvements, and UI design.
- Significantly increased platform capabilities and reliability, delivering high-quality solutions for enterprise clients.

Full-Stack Developer

Feb. 2025 – Oct. 2025

Dibs Media Group

Hybrid

- Built a gamified e-commerce App for businesses using **Next.js** (frontend) and **Spring Boot** (backend).
- Implemented **WebSocket** real-time selling sessions and integrated **Stripe** for secure payments.
- Created an extensive animation library and centralized theming with **Framer Motion** and **shadcn**, enabling white-label support.
- Developed backend with **Spring Security**, monolithic architecture with separation of concerns, ensuring portability to microservices.
- Managed CI/CD on **GCP** using **GitHub Actions**, **Docker**, and automated testing pipelines.
- Optimized performance, scalability, and maintainability

Technical Support Agent

Sep. 2024 – Jan. 2025

HPE

Hybrid

- Provided L1 technical support for HPE Proliant, Blade, MD, DL servers, and HPE storage systems including 3PAR, MSA, and Tape Libraries.
- Troubleshoot a wide range of issues from firmware to hardware components, resolving complex problems beyond typical L1 scope.
- Collaborated with a global team and supported enterprise customers across the EMEA region, gaining experience in cross-cultural teamwork.

- Developed deep understanding of enterprise server infrastructure and networking, including switches and storage systems.

Full-Stack Developer

Aug. 2023 – Aug. 2024

CodeCooperation

Hybrid

- Developed scalable and user-friendly web applications using **Next.js** and **NestJS**.
- Worked closely with cross-functional teams to deliver a smooth user experience.
- Designed clean, maintainable architectures leveraging dependency injection and modular design.
- Implemented CI/CD pipelines using **GitHub Actions** and improved deployment workflows.
- Integrated **Stripe** for secure payment processing.
- Conducted internal knowledge-sharing sessions on OpenAPI and development tools.

EDUCATION

Engineer's Degree — Software Engineering

Sep. 2023 – Present

TEK-UP University

El Ghazela, Tunisia

Bachelor's Degree — Software Engineering

Sep. 2019 – Jun. 2023

Higher Institute of Information and Communication Technologies (ISTIC)

Tunisia

NOTABLE PROJECTS

TippJob

Next.js / NestJS / Prisma / Stripe

- Developed a modern job search platform with a streamlined application process.
- Implemented one-click job applications and time-limited job postings.
- Integrated Stripe payments and automated email workflows.

Senioren Platz Finder

Next.js / NestJS / Prisma / CI/CD

- Built a white-label healthcare placement platform with a single codebase.
- Implemented advanced theming and strict data isolation per client.
- Designed CI/CD pipelines for automated branch deployments.

Cyber Maturity Assessment Tool (CMAT)

Next.js / NestJS / Data Analysis

- Developed a security assessment platform with an 80-question evaluation system.
- Estimated financial impact of cyber threats using user assessments.
- Integrated dynamic threat intelligence via automated web scraping.

BELDEN PPC Software

Python / Pandas / Next.js / Excel

- Developed software to manage and test fiber optic infrastructure, processing large datasets.
- Performed data cleaning and analysis using **Pandas** to generate actionable insights.
- Created organized Excel reports and automated data collection from test machines.
- Built a **Next.js** frontend for seamless data upload and interaction.

MedFlow

Ionic / React / Next.js / Capacitor / Neon DB

- Developed a multi-tenant clinic management platform for doctors, patients, consultations, services, and prescriptions.
- Implemented audit tracking for both clinics and patients, ensuring data integrity and compliance.
- Designed a mobile-first interface with **Ionic** and **React** for seamless cross-device usage.
- Handled backend logic, data storage, and multi-tenant architecture using **Next.js** to securely isolate clinic data.
- Streamlined workflows for appointments, prescriptions, and patient management, improving operational efficiency.

Khebra.tn

Next.js / NestJS / Tailwind / Supabase

- Built a mentor–mentee platform for managing sessions, payments, and profiles.
- Implemented escrow system, session booking, and real-time notifications.
- Leveraged Supabase auth for extensive user management and authentication/authorization system with RLS
- Ensured scalable and maintainable architecture with modular design and clean backend separation.
