## ◦ Skills & Technologies ◦

### Frontend Development

React | Next.js | Angular

### Backend Development

Spring boot | Websocket | Node  
Express | Nest.js | Python | SQL

### DevOps

Docker | CI/CD

### Cloud

Digital Ocean | Virtualization |  
Serverless Architecture

### Git

GitLab | Github

### System Design

Clean Coding | Design Principles |  
Microservice Architecture | High  
performance | Scalability

### SCRUM

Scrum ceremonies |  
Documentations | Scrum Artifacts

## ◦ Languages ◦

Arabic    English    French

## ◦ Education ◦

### Higher Institute of Information and Communication Technologies

Software Engineering and  
Computer Systems  
Bachelor's Degree  
Sep 2019 – Jun 2023

### Tek-Up University

Software Engineering  
Engineer's Degree  
Sep 2023 – present

## Profiles

📌  Islem Bargaoui

📌  Islem Bargaoui

## Summary

- Results-driven **Node & Java Developer** with a strong background in building scalable, high-performance backend applications. Passionate about microservices, RESTful APIs, and cloud-based architectures. Experienced in designing, developing, and optimizing enterprise solutions while ensuring clean code and maintainability. Always eager to learn and implement the latest best practices in backend development.

## Experience

### BELDEN

Web Developer

July 2024

- Developed internal software for BELDEN's fiber optic management system, analyzing, and cleaning data using **Python**.
- Developed a **Spring Boot** backend for fiber channel testing management, allowing testers to log results and track testing phases.

### CodeCooperation | Full time 🌐

Full-Stack Developer

August 2023 – July 2024

- Developed scalable, user-friendly web applications using **Next.js**, **Nest.js** and **Spring boot**.
- Improved performance and stability with server-side rendering.
- Created a maintainable codebase using features like dependency injection and routing.
- Implemented SOLID principles and design patterns, ensuring easy feature additions and system integrity.
- Enhanced **CI/CD** processes with **GitHub Actions** and improved GitHub/Jira integration.
- Integrated **STRIPE** as a secure payment gateway.
- Offered weekly training sessions on development tools like OpenCommit and OpenAPI.

### Freelance

Developer

Tunis

2020 – Present

- PFE:** Developed multiple End-Of-Study projects for students using various technologies.
- Web projects:** Created a music streaming and ticket-based customer support platforms with **Angular** and **Node Express/NextJS** and **Spring boot**.

## TippJob – Web App 🌐

- Created **TippJob**, a user-friendly job search platform.
- Used **Next.js** for the front-end and **Nest.js** for the back-end.
- Managed MySQL database with **Prisma ORM**.
- Integrated **Mailjet** for email functionality.
- Integrated **STRIPE** for secure payment processing.
- Ensured reliability and scalability with a well-structured codebase.

Next.js, Nest.js, Prisma ORM, Mailjet, STRIPE

## Sacha App – Digital Discount Voucher Platform (PWA) 🌐

PWA platform using **Next.js / Spring boot** enabling restaurants to distribute discount vouchers to patrons.

NestJS, Prisma ORM, MySQL, Docker, Digital ocean, S3, Spring boot

## Projects

### • Cyber Maturity Assessment Tool – CMAT 🌐

- Designed and implemented **Spring Boot / Next.js** cybersecurity assessment platform.
- Conducts security evaluations with assessments.
- Estimates the financial impact of cyber threats based on completed assessments.
- Includes a **dashboard** for tracking assessments and visualizing security progress.
- Used **Spring Data JPA** with PostgreSQL to manage assessment results.
- Implemented a **dashboard with threat analysis** using REST APIs.

Next.js, spring boot, Spring Data JPA, OpenAPI, Swagger

### • Senioren Platz Finder – Web App 🌐

- **Tech Stack:**
  - Developed with **Next/Nest** (TypeScript).
  - Utilized **Prisma ORM** for SQL database management.
  - Employed **OpenAPI/Swagger** for API documentation and services generation.
- **White Label Solution:** Implemented a customized White Label Solution with a unified codebase and database setup. Integrating **Material UI theming** for customizable color integration.
- **CI/CD Pipelines:** Automated branch deployment and creation workflows with JIRA integration using GitHub Actions CI/CD pipelines.
- **Admin Panel:**
  - Implemented a **State Machine** feature in the admin panel to visualize relationship statuses between care seekers and facilities.
  - Facilitated efficient management and monitoring of user interactions.
  - Optimized administrative workflows and decision-making processes.

NextJS, NestJS, Prisma ORM, OpenAPI, Tailwind CSS, Material UI, CI/CD Pipelines

### • Tekdheb Online – Multiplayer Card Game (PWA) 🌐

- Developed a multiplayer **PWA** for the Tunisian card game "Tekdheb."
- Utilized **Spring boot** for robust backend logic.
- Implemented **NextJS** with **NextUI** and **Framer Motion** for a visually engaging user experience.
- Planned future features include user accounts, leaderboards, and AI-powered matchmaking.

PWA, Next.js, Spring boot, Framer motion
